

nTZS — System Architecture Diagram

nTZS — System Architecture (Sandbox)

1:1 TZS-backed issuance / redemption on Base · BoT Sandbox Ref. LD.170/515/02/1254

Redemption reverses steps 4–5: burn nTZS → release TZS from trust → PSP pay-out.
Both mint and redemption require dual approval (maker-checker).

→ issuance flow - - -> reserve backing - - -> reconciliation
